VEHICLE ACCESS

**ACCESS MUST BE SUFFICIENTLY
WIDE, FREE OF OBSTACLES AND
REASONABLY LEVEL**

OFFLOADING

Deliveries will be required to be unloaded mechanically by fork truck or the customer must provide alternative sufficient resources i.e. labour to offload as safely and as speedily as possible. Duffield Timber drivers have completed manual handling instruction and fully understand their capabilities. In the interest of health and safety and the obvious well being of the drivers they have been instructed NOT to manually handle excessive weights. Furthermore, the driver reserves the right to abandon the delivery if the customer is deemed not to have taken reasonable measures to ensure a safe delivery.
